

N50-LT Exn Linear

Zone 2, 21, 22

OVERVIEW

The N50 LT LED Exn is a Zone 2/21/22 hazardous area luminaire designed for use in highly corrosive explosive environments. This specialized fitting constructed from 304 stainless steel or marine grade 316 stainless steel with a 4mm clear tempered glass lens has been tried and tested and is widely used as a light of choice within

the Oil and gas, petrochemical, marine and other hazardous area applications. This robust IP65/IK08 fitting is manufactured in a 1200mm 18W and 1200mm 36W version. The LED tubes for this fitting can be supplied in standard lengths or in a proprietary Nordland length. The advantage of the proprietary

Nordland length is that a fitting cannot inadvertently be fitted with an LED tube not certified for the application. The use of a replaceable geartray provides the user with a fitting that is future proofed for longevity hence saving long term cost and providing for swift and simple maintenance.
